

國立中正大學

哲學系學術演講

講者：簡士傑（牛津大學哲學博士）

講題：Some Problems with Comparative Valuing

時間：2021.4.14 (Wed.) 15:10-17:00

地點：文學院 412 研討室

摘要：

The aim of this talk is to expose a new kind of irrational valuing structure, which I shall call self-defeating comparative valuing (SDCV). While on a par with other irrational valuing structures such as temporal discounting and intransitive preferences, SDCV has not yet been noticed in the literature. In this talk, I will first consider procrastination and other irrational choices in real life so as to illustrate the structure of SDCV. I will then examine the rational problems of SDCV and thereby propose some new rational principles governing our valuing. Finally, I will discuss some implications of SDCV on our understanding of value and rational choice.
